DOC Energy Solutions is an engineering company comprised of industry renowned surface facility experts with specialized knowledge in crude oil, gas and produced water treatment. Our in-house expertise includes engineers with multiple patent ownership for downhole and hydrocyclone separation technology, as well as publishers of technical articles in the oil and water separation technology field.

Our engineers have traveled worldwide to major oil producing regions including North America, Brazil, North Africa, West Africa and the Middle East to make technical presentations and deliver surface treatment facilities that meet customer specifications.

DOC Energy offers innovative solutions for oil, water and gas surface treatment facilities, while protecting people and the environment in which we operate.

OUR SERVICES:

Detailed design, fabrication and supply of oil treatment facilities and equipment packages:

- Free-Water Knockout packages
- 3-Phase Separator / Degasser packages
- 2-Phase Separator Packages
- Dehydrator packages
- Heater Treater packages
- Electrostatic Dehydrator / Desalter packages
- Ancillary equipment packages: Crude charge pumps, Heat Exchangers, Crude Heaters, Desalter mix valves etc.

Detailed design, fabrication and supply of gas treatment facilities and equipment packages:

- Glycol Dehydration packages
- Amine Sweetening packages
- Dew Point Control packages
- Gas Compression packages
- Ancillary equipment packages: flash separators, pumps, heat exchangers etc.

Detailed design, fabrication and supply of produced water treatment facilities and equipment packages:

- Skimmer Tank packages
- Gas Floatation Unit packages
- Produced Water Filtration packages
- Ancillary equipment packages: heat exchangers, water recycle pumps etc.

Refinery Services: Detailed design, fabrication and supply:

- Electrostatic Desalter packages
- Electrostatic Dehydrator packages
- Mechanical Coalescer packages
- 3-Phase Separator packages
- 2-Phase Separator packages
- Troubleshooting and consulting (Separation equipment)

Additional Services include:

- Conceptual Engineering Design
- Front-End Engineering Design
- Detailed Process and Mechanical Engineering Design
- Consulting Services
- Procurement Services
- Fabrication and Construction Services
- Project Management Services
- Pre-commissioning and Commissioning Services
- Operations and Maintenance Support

ON TIME DELIVERY

Utilizing pre-engineered designs for facilities and process equipment along with established industry standards and design specifications, we are able to provide safe, high performing, long-lived production and processing facilities on greatly accelerated schedules.

GLOBAL FABRICATION

DOC Energy has key relationship with global fabricators worldwide. We have the flexibility to fabricate and assemble at multiple locations worldwide to address the specific needs of our clients.

WORLD CLASS SURFACE TREATMENT EXPERTS

DOC Energy Solutions is comprised of industry renowned surface facility experts with specialized knowledge in crude oil, gas and produced water treatment.
